TIG **EV MILLS**

Economical High Performance
Solid Carbide End Mills

- Chatter free design for High-Speed Milling
- Short plain and from Flat adapted shank to save material
- Short 1xD Length-of-Cut to cover most applications and to maintain stability

- Extremely stable due to short design addressing also the growing market of mill-turn machines
- Environmentally friendly design minimizes raw material and grinding costs
- Soft cut to support mill-turn machines as well driven units in lathe tooling
- Radius transition created between floor and wall (according DIN) with undersize end mills increases durability of machined shafts
- Instead of regrinding use a new EV MILL with 100% performance
